About myself:

I like to create and structure tables, and I can create formulas to create more accurate information. I like to perform technical monotonous work in the engine with precision. If necessary, I keep documentation, collect and analyze data, and write technical specifications for sound designers, VFX, artists and programmers, taking into account their specific needs. I create deconstructions to gain a deeper understanding of similar projects. During my studies, I created the project entirely on my own, so I have a basic understanding of how other team members work.

Participation in jams	Hard Skills
Dreamtide: - Level designer. - Sound designer. Chakram: - Producer. - Programmer. - Sound designer. One last card: - Team leader and manager. - The only programmer.	Unreal Engine 5, Unity, Twine C++, C#, Python (beginner level) Adobe InDesign, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Adobe Audition, Fl Studio 20, Blender, GitHub Miro, Figma, Notion, Google and Microsoft Office services
The best student projects	
Puzzle - Team leader and producer. - Lead programmer: Character control; Implementation of camera mechanics; Base for interactive objects; AI of ghosts.
